Perumahan PT. Tifico Block C3 No 4 ,Serpong Utara, Tangerang Selatan.

Informatics graduate with a strong interest in IT support and problem solving. I have hands-on experience in troubleshooting hardware, software, and basic network issues, and I enjoy helping users resolve technical problems. I am a quick learner, adaptable, and ready to contribute in a fast-paced work environment.

Work Experiences

PT. Vaganza Digital International - Indonesia - **Bandung** Jul 2023 - Sep 2023

SOFTWARE DEVELOPER

- Developed a full-stack e-commerce website using Laravel, PHP, and MySQL
- Tested and fixed issues to make sure the system ran properly
- Built responsive interfaces for better user experience
- Tried integrating third-party APIs such as shipping and payment services
- Used Git to manage code and track progress

Education Level

National Institute of Technology Bandung - **Bandung** Aug 2019 - Feb 2026

Bachelor of Informatics

- Thesis: Optimization of Autoencoder and LSTM for Anomaly Detection in Commercial Aircraft Engines through Hyperparameter Fine-Tuning

Academic & Project Experience

Autoencoder and LSTM Optimization for Aircraft Engine Anomaly Detection - **National Institute of Technology Bandung**

- Developed an anomaly detection model for aircraft engine data using Autoencoder and LSTM.
- Processed and prepared sensor data, trained the models, performed hyperparameter tuning to improve performance, and evaluated the results using performance metrics.

IGLASSCLEAN: IoT-Based Smart Window Monitoring and Automatic Cleaning System - **National Institute of Technology Bandung**

- Designed and developed an IoT-based automatic glass cleaning system using ESP32-S3 that responds to real-time rain detection.
- Developed IoT-based monitoring system integrated with Laravel dashboard and Flutter mobile app.

Library Management System – SMPN 57 Bandung - **National Institute of Technology Bandung & SMP Negeri 57 Bandung**

- Developed web-based system using Laravel and MySQL to replace manual processes.
- Implemented core features including Book & E-Book Management (CRUD), loan submission and approval, return processing, member and class management, and admin/member dashboards.
- Conducted manual functional testing to ensure system features met requirements.

Achievements & Skills

- **Projects** (2024): Digital Library System - SMPN 57 Bandung(Pengabdian Kepada Masyarakat)
- **Achievements** (2025): Huawei ICT Academy Artificial Intelligence V4.0
- **Achievements** (2021): Huawei ICT Academy AI Course (KMI)
- **Programming & Development**: PHP (Laravel), Flutter, Python, HTML, CSS, JS, Bootstrap
- **Database**: : MySQL, SQL (Basic), Database Design
- **Software Development**: SDLC, System Requirement Analysis, Debugging & Testing
- **Tools IT** : Tools: Postman, Git (Basic), Microsoft Office, Power BI, AnyDesk, TeamViewer,Command Prompt, Task Manager, Event Viewer.
- **AI** : Machine Learning,Data Analysis (Pandas, NumPy), Anomaly Detection, Data Mining, Time-Series Data Processing, Model Evaluation, Data Preprocessing.
- **Soft Skills**: Problem Solving, Analytical Thinking, Teamwork, Communication, Adaptability.
