

LUTHFI ARDYANSYAH

+6287771122098 | lutpayway@gmail.com | <https://www.linkedin.com/in/luthfiardyansyah/> | lutpayway.github.io
Tangerang Selatan, Indonesia.

Informatics graduate with experience in software development, troubleshooting, and machine learning projects. Skilled in Laravel, Python, MySQL, and data preprocessing, with hands on experience in anomaly detection using Autoencoder and LSTM models. Interested in AI Engineer, Backend Development, and Technical Support roles

Work Experiences

PT. Vaganza Digital International - Indonesia - Bandung Jul 2023 - Sep 2023
Software Developer Intern

- Developed e-commerce web application features using Laravel, PHP, and MySQL.
- Implemented product management, transaction, and sales-related features.
- Performed troubleshooting and debugging to improve system stability.
- Built responsive user interfaces using Bootstrap.
- Assisted API integration for payment and shipping services.
- Used Git for version control and collaboration.

PT Astrophile Cetta Technology Feb 2025
Junior Web Developer(Freelance/Project-Based)

- Developed web-based asset inventory system using Laravel and Tailwind CSS.
- Developed and customized company landing pages using WordPress.
- Built academic information system using Next.js with authentication and academic data management features.
- Assisted LAN network and DVR-based CCTV installation and configuration.
- Performed testing, troubleshooting, and system maintenance to ensure operational stability

Education Level

National Institute of Technology Bandung - Bandung Aug 2019 - Apr 2026
Bachelor of Informatics

- Thesis: Optimization of Autoencoder and LSTM for Anomaly Detection in Commercial Aircraft Engines through Hyperparameter Fine Tuning

Academic & Project Experience

Autoencoder and LSTM Optimization for Aircraft Engine Anomaly Detection - National Institute of Technology Bandung

- Developed anomaly detection models using Autoencoder and LSTM with Python.
- Processed and analyzed NASA C-MAPSS aircraft engine simulation datasets.
- Performed hyperparameter tuning and model optimization to improve detection performance.
- Evaluated model performance using machine learning metrics

IGLASSCLEAN: IoT-Based Smart Window Monitoring and Automatic Cleaning System - National Institute of Technology Bandung

- Developed IoT-based automatic glass cleaning system using ESP32-S3.
- Integrated Laravel dashboard and Flutter mobile application.
- Implemented real-time rain detection monitoring system

Library Management System – SMPN 57 Bandung - National Institute of Technology Bandung & SMP Negeri 57 Bandung

- Developed web-based library management system using Laravel and MySQL.
- Implemented book management, loan processing, and member management features.
- Performed functional testing and debugging.

Asset Inventory System - <https://inventaris.up45.ac.id>

Astrophile Cetta Technology (2026)

- Developed web-based asset inventory system using Laravel and Tailwind CSS.

- Implemented role-based access control and inventory management features.
- Developed inventory request, stock management, reporting, and RFID-based borrowing features

Company Landing Page - <https://fassolusiutama.com>

Astrophile Cetta Technology (2026)

- Developed responsive company landing page using WordPress.
- Customized themes and layouts based on client requirements.
- Implemented plugins and optimizations for performance, security, and SEO

Academic Information System - <https://siakad-up45.vercel.app>

Astrophile Cetta Technology (2026)

- Developed academic information system using Next.js.
- Implemented authentication and academic data management features

Network & CCTV Project

Astrophile Cetta Technology (2025)

- Assisted LAN network and DVR-based CCTV installation and configuration.
- Configured router, switch, and IP addressing for monitoring systems.
- Performed testing and troubleshooting to ensure system stability

Achievements & Skills

- **Projects** 📌 (2024): Digital Library System - SMPN 57 Bandung(Pengabdian Kepada Masyarakat)
- **Achievements** 📌 (2025): Huawei ICT Academy Artificial Intelligence V4.0
- **Achievements** 📌 (2021): Huawei ICT Academy AI Course (KMI)
- **Programming & Development:** PHP (Laravel), Flutter, Python, HTML, CSS, JS, Bootstrap
- **Database:** MySQL, SQL (Basic), Database Design
- **Tools:** Postman, Git (Basic), Microsoft Office, Power BI, AnyDesk,Command Prompt, Task Manager.
- **AI:** Machine Learning, Autoencoder , LSTM , Pandas , NumPy , Data Preprocessing.
- **IT Support:** Hardware & Software Troubleshooting, Windows Installation & Configuration, LAN Network Basics, CCTV System Assistance, Remote Support
- **Soft Skills:** Problem Solving, Analytical Thinking, Teamwork, Communication, Adaptability.
